

Recognition of Association Experience in the EPFL Rocket Team

Enhancement of activities within the association

This document aims to certify the member's experience within our association

Full Name	Pauline de Baets
Role(s) Held	Team Member for Recovery
Year or Period of Active Membership	2024-2025
Tasks completed by the Member in Their Role(s)	Design, manufacturing and testing of a pyrotechnic cutter used on the Recovery system of the EPFL Rocket Team's sounding rocket Firehorn 1. This system was flown and flight validated at the 2025 European Rocketry Competition where the team reached second place thanks to a succesful recovery. The design was started from scratch, going from a state of the art, followed by a complete CAD, which was then manufactured. Once made, the design saw significant iterative improvements based on testing results, finally achieving an optimized system.
Key Highlights, Achievements, Results of this Commitment (Outcomes, Metrics, Added Value...)	Exceptional dedication in time, specifically for the manufacturing process (done completely in house) and the extensive testing campaign during the EPFL semester. Good understanding of designing for machining processes, as the system was made for manufacturability
List of Attached Documents (Digital Format)	

A committee member and the direct supervisor certify that the above information is correct:

Full name Pedro Sànchez-Moreno Royer

Full name Rayane Maalouf

Position 2025 Recovery Team Leader - 2026 PM

Position 2025 Vice President - 2026 Systems Engineer

Location, Date Ecublens, 11 May 2026
